

**Field Informatics on
sea turtles, Mekong giant catfish
and dugongs promoted in
Thailand**

Nobuaki ARAI
Graduate School of Informatics,
Kyoto University

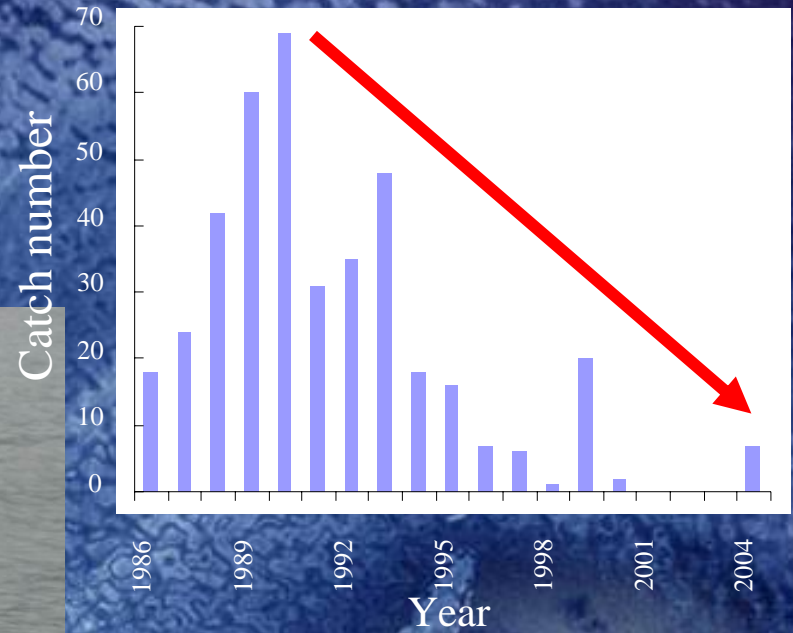

SEASTAR2000

- Southeast Asia Sea Turtle Associative Research since 2000
- Sea turtle by-catch of shrimp trawlers

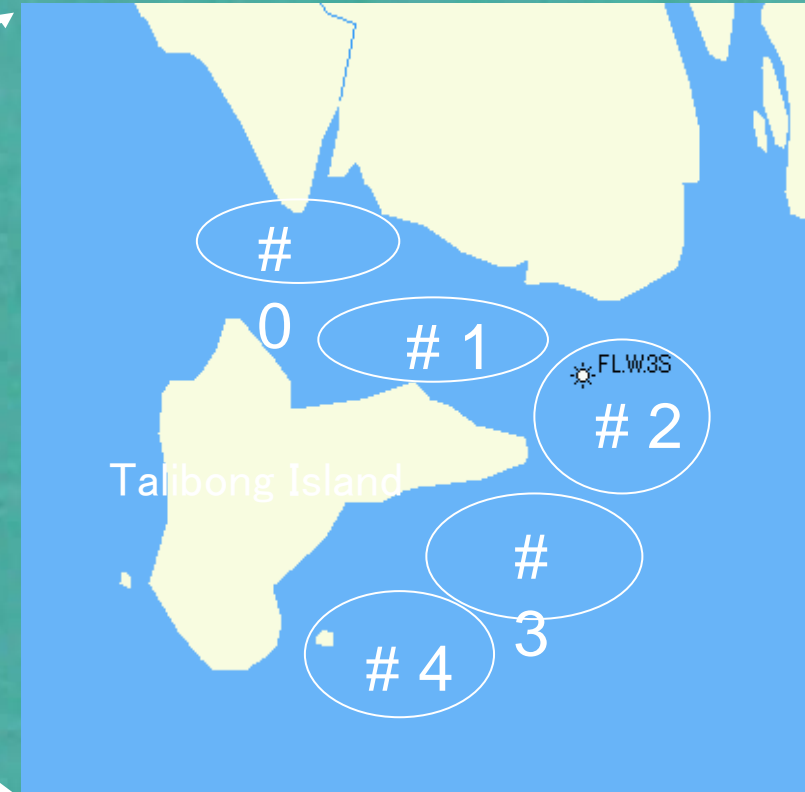

Mekong giant catfish tracking project

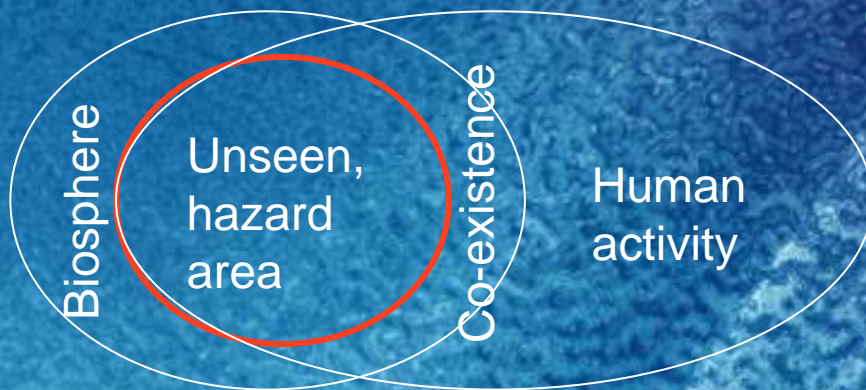

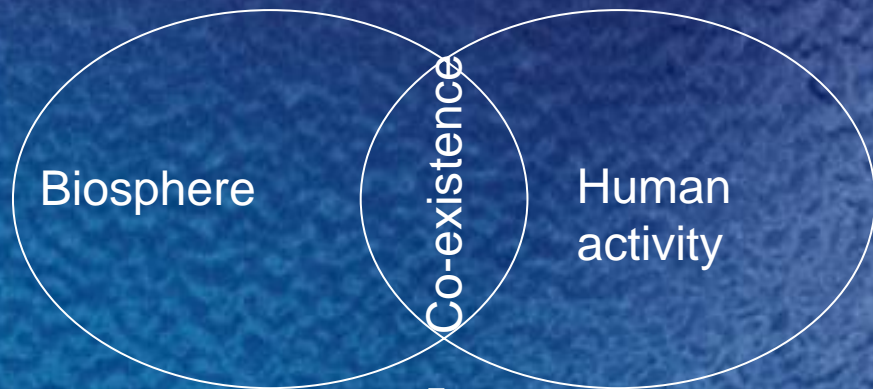

- Reservoir
- Mekong River

Dugong biological survey

Field Informatics

- The technological improvement conceives the possibility of dangerously doing symbiosis and the coexistence of biosphere and human beings
- It is necessary to acquire information and to analyze that it is difficult in the technique for acquisition and the understanding of biosphere information on more multi-dimensional and a multi item so far
